

# E-COAT Pro V2 Series

## Manual Powder Coating Equipment

On E-COAT Pro V2 series equipment is suitable for both manual and automatic applications. E-COAT Pro V2 does rapid coating on tough surfaces with high coating performance. It can hold 50 different recipes. The unit has 3 default presets namely straight surface coating, secondary layer coating and tough surface coating.

# E-COAT Pro V2 Series

Manual Powder Coating Equipment

	E-COAT Pro V2 B (Bare Type)	E-COAT Pro V2 H (Hopper Type)	E-COAT Pro V2 M (Multicolor Type)
E-COAT Pro V2 Control Unit	+	+	+
E-GUN C2 Manual Powder Coating Gun	+	+	+
E-FEED V2 Powder Injector	+	+	+
“Quick” Hose Connection Adaptor	2 pcs.	2 pcs.	2 pcs.
Fluidizing unit with filter regulator	+	+	+
Double Conductive Anti Static Powder Hose	5 m	5 m	5 m
Supplementary Air (Blue) Hose	4 m	4 m	4 m
Conveying Air (Red) Hose	4 m	4 m	4 m
Nozzle Air (Black) Hose	5 m	5 m	5 m
Mobile Car	—	+	+
Stainless Hopper	—	+	—
Multicolor Suction Hose	—	—	+
Multicolor Vibration Motor	—	—	+

## E-COAT Series Accessories\*

\*Accessories are only for Bare Type equipment.

## E-GUN C2 / Manual Powder Coating Gun

E-GUN C2 type Corona principled powder coating gun is fed with electrical signal for static charge, and the electrical charge flowing out of the gun get to the optimum amount of coating quality with the electrical feedback mechanism. The electrical charge can be seen live on the control unit.

- Static Current Control ve Feedback Mechanism
- Static Voltage Control ve Feedback Mechanism
- Manually Regulated Pneumactical Control
- Conveying Air, Supplementary Air, and Nozzle Air can be Controlled separately.
- 50 different recipe records.
- 3 fast recipe recalls namely Straight Surfaces, Tough Surfaces and Secondary Layer Coating.
- Easily controlled User Interface with endless roller knob.
- ATEX II 3D, IP54 Protection Class for the Control Unit.
- ATEX II 2D, IP64 Protection Class for the gun.
